

## DOCTORAL STUDIES

*To access a job in scientific disciplines, whether public or private sector, a PhD is often a major asset. Acquiring it depends on gaining a set of theoretical and professional knowledge necessary to practice scientific research and discovering a set of opportunities available for professional life. Theoretical knowledge is mainly obtained during the first five years of university studies (3 years in bachelor and two years in masters) that precede the initiation of the thesis.*

*The main objective of this training is to train youth PHD for the future, who can easily integrate the education field in the teaching teams at the Algerian's university, join research teams in centers, units, and research laboratories, gain research skills, and produce scientific and technological knowledge.*

*By Decree No. 1434 of August 21, 2019, the University of Laghouat was rehabilitated to ensure training for a Ph.D. for the 2019-2020 academic year*

- **Field / sector:** Material Sciences / Chemistry
