Speaker List with Topics

	NAME / TITLE	COURSE TOPICS Courses run at the same time – each student may take one course during this week.
	BRIAN SMITH President and Chief Executive Officer, Wagner Logistics	Third-Party Logistics and the Supply Chain Industry: This class explores the role of third-party logistics firms in the supply chain industry. It will begin by discussing why third-party logistics exists as a business model. It will then use case-studies to address challenges in the third-party logistics industry involving efficiency standards, labor and transactional relationships, and capital management.
	DAVID FISHER Chairman, InUni Global	The Business of International Higher Education. David Fisher explores the billion-dollar industry of international higher education, looking at the industry through the lens of InUni Global and the life-cycle of the international student. A must-take program for anyone interested in study abroad – or in working in this massive and growing industry.
	IBRAHEEM BADEJO, Ph.D. Johnson & Johnson	Innovation and Entrepreneurship. Ibraheem Badejo explores the subject of innovation with a focus on his industry, healthcare. As a prolific inventor, he wants to also discuss what it takes to invent and how to protect such inventions. Inventions and innovation require funding, how to raise funds, and build a sustainable company.
	LAWRENCE MARSH, Ph.D. Professor Emeritus in Economics (retired), University of Notre Dame	Regression Analysis: Understanding and Building Business and Economic Models. University of Notre Dame economist Larry Marsh sees regression analysis as an essential tool in business and economics for prediction and forecasting. This course will enable you to understand how to make effective use of regression analysis. Required prerequisite for this course is a course in basic probability and statistics
	DAVID HAMOD President at Chief Executive Officer, National US-Arab Chamber of Commerce	Community Engagement: An Arab-American Perspective: Community engagement is at the heart of civil society. In the USA, non-governmental organizations (NGOs) – like chambers of commerce – play an instrumental role in shaping national policies and fostering economic growth. Trade associations are an integral part of this process, and David Hamod will share perspectives (as an American of Arab descent) on the importance of engaging community stakeholders in public policymaking.
	CHRISTINE OJILE Vice President, Strategy and Growth, Kantar Consulting LLC	The Future of Global Commerce: Christine Ojile looks through the lens of Kantar's global retail framework, the Market Evolution Model (MEM); to demonstrate key drivers impacting market readiness. The future of commerce is influenced by macroeconomic factors, market disruptors, and other key factors / themes that will drive retail trade, product and brand development, and consumer shopping behavior. This session will illustrate the power of research and leveraging fact-based data/ insights to drive strategy and decision-making across a variety of businesses.
	GEORG OLOWSON Leader, Artificial Intelligence Governance, IBM	Artificial Intelligence: Promise, Peril and Issues: In this five-day program, George Olowson reviews the evolution and development of artificial intelligence (AI) and explores both potential and dangers to consider. The class will also explore matters of AI governance and considers how to build trusted and ethical AI for business.

Speaker List with Topics

	NAME / TITLE	COURSE TOPICS Courses run at the same time – each student may take one course during this week.
	STEPHAN RECKIE Chief Executive Officer, Edge of Space	Business Beyond Borders: Navigating the Cosmos Embark on a cosmic journey to explore the fascinating intersection of business and space exploration. As humanity strides towards becoming a multi-planetary species, unprecedented opportunities for innovation and entrepreneurship are unfolding. This course delves into the rich history of humanity's ventures into space and provides a comprehensive overview of the evolving landscape of space business. From the early space race to the contemporary era of private space exploration, we will examine key milestones, breakthroughs, and the transformative impact of space technology on various industries. In the spirit of the Overview Effect, where borders disappear when viewed from space, we will challenge traditional notions of business boundaries. Space is the ultimate frontier, and as we reach for the stars, we will explore how businesses can transcend terrestrial constraints and capitalize on the boundless opportunities that space presents. Join us on this intergalactic adventure as we investigate whether the sky is the limit for aspiring entrepreneurs and business leaders. Are you ready to boldly go where no business has gone before? Enroll now and be part of the next frontier in commerce!
	TOM SULLIVAN Vice President, Small Business Policy, US Chamber of Commerce	Political & Legal Influence of SMEs in the United States and Abroad: This program will explore the political and economic influence of SMEs in the United States and how that value translates into a legal framework advantageous to the SME community. The 5-day program will examine models used regionally and nationally in the United States as well as international approaches and will dive into challenges that confront SME stakeholders
	JIM BURKEE, Ph.D. President, Avila University	The Legacy of Hannibal Barca. This program examines the life and impact of Hannibal Barca, who led the last army to challenge Roman supremacy in the ancient Mediterranean. It will explore Carthage's impact on the region and his, and its, legacy in modern-day Tunisia.
	MALEK KOCHLEF Director of International Cooperation, Tunisia Ministry of Higher Education and Scientific Research	

Don't Miss Out on This Unforgettable Experience!
